Public Disclosure Document

MS Cyber Security and Digital Forensics

Department of Information Technology

College of Computer and Information Sciences

Majmaah University

Al Majmaah, Saudi Arabia

Date: October 28, 2025

1. Overview

The Department of Information Technology ensures that public disclosure documents for the MSCSDF program present program specifications, learning outcomes, KPIs, self-study reports, and accreditation status aligned with NCAAA standards. These disclosures promote transparency and academic quality assurance.

2. Mission, and Objectives

The program defines clear Vision, Mission, and Objectives aligned with the university strategy.

Mission:

Prepare highly skilled graduates to compete locally and globally in Cybersecurity and Digital Forensics. Focus on advanced knowledge, hands-on training, competitive-learning, research, professional growth, and ethical values to serve locally and globally.

Objective:

PE01	Excel as professionals by applying theory and practice, demonstrated through integrating competitions into assessment and research work.
PE02	Continuously advance expertise in system security, incident management, and digital forensics through development of project-based assignments that mimic competitive secure environments.
PE03	Follow a career path toward leadership and community service through innovation, ethics, and competitive engagement.
